| | |
|-----------|--|
| Languages | TypeScript, JavaScript, Python, PHP, Java |
| Frontend | React, React Native, Ionic, Angular |
| Backend | NestJS, NodeJS, Express, Flask, Spring Boot |
| Databases | PostgreSQL, MySQL, MongoDB, BigQuery |
| Tools | Docker, Git, GraphQL, Prisma, Postman, Figma |
| Others | Scrum, Microservices, PWA, Design Patterns |

Experience

Bombieri

- **Product Owner & Full Stack Developer | 2021 – Present**
 - Functional and technical leadership within a Bombieri development squad, managing roadmap, backlog prioritization, and feature validation with stakeholders.
 - Team coordination and contribution to strategic decisions regarding architecture and product direction.
 - Full stack development for internal high-impact projects, including:
 - Ecomdrop – Dropshipping platform
 - Technical onboarding of new developers, product ownership, continuous improvements.
 - Implementation of quality practices such as code reviews, testing, metrics, and documentation.

Technologies: React, NestJS, TypeScript, PostgreSQL, Docker, Git, Scrum

- **Banco Patagonia (Cliente - Bombieri) | 2025 – Present**
Java Backend & React Developer

- Development and evolutionary maintenance of the PADI banking chatbot, ensuring a smooth technical transition from the previous provider while maintaining service continuity.

- Implementation of new backend features using Java + Spring Boot, integrating internal services under the regulatory standards of the financial sector.
- Enhancement of frontend components in React to improve performance and user experience.
- Collaboration in the resolution of critical incidents, ensuring service availability and stability.
- Agile development workflow with CI/CD, managing releases and secure deployments in coordination with architecture and security teams.

Technologies: Java, Spring Boot, React, TypeScript, Jenkins, GitLab CI/CD, REST APIs

Rebrit SRL - Frontend Developer (2021)

Interface development.
